

Blower Enclosures

Reduce noise levels significantly, while protecting the blower from water, dirt and other environmental factors, and from cleaning chemicals during washdown.

Designed for durability and ease of maintenance, Paxton's washdown-duty acoustical blower enclosures protect the blower from harsh environments. The rugged polypropylene enclosure reduces sound levels to within OSHA standards; and the design has no crevices that can hold moisture, greatly reducing the potential for bacteria to grow.

- Protect in harsh, corrosive and wet environments
- Significant sound abatement
- Simplify blower installation and maintenance
- Maintain lower blower temperature for optimum performance

- Reduce noise levels
- Protect blower from dirt, water, corrosivity
- Optimize blower temperature & performance

Air Systems designed and engineered by Paxton Products come with a 100% Performance Guarantee and a best-in-class 3 year warranty on AT- and XT-series blowers

Durable & Functional

- Welded Polypropylene Enclosure
- Stainless Steel base
- Oversized access doors for easy servicing

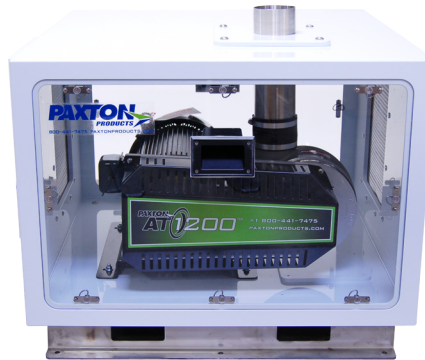

Features:

- AT-series enclosures include removeable, reusable, and washable mesh pre-filters that trap larger airborne particulates, extending the service life of the blower inlet filter
- Oversized clear Lexan access doors for easy servicing: no need to disturb ducting to inspect or service the blower
- Available in 4" and 24" high base models
- Shipped with blower pre-mounted to allow quick, turnkey installation
- Strong, polypropylene enclosure withstands harsh, wet and corrosive environments
- No crevices to hold moisture
- Designed for movement and placement by fork lift
- Swivel style (adjustable) leveling feet with anchoring holes
- Half turn, fast-lock access door fasteners
- O-ring sealed sanitary discharge pipe, 3 or 4 inches
- Durable 304 stainless steel base
